

Crypto Kitchen

26.02.2020

By Adrien Berthou, Igor Line & Ludovic Bret

Akasha Hub Barcelona

Let's get started

Say hi & introduce yourselves

Pay fee

Share your email address to receive next steps

Who & Why

Professionals of the blockchain industry

- Adrien Berthou
- Igor Line
- Ludovic Bret

Win-Win-Win situation

- 1/ support projects we like & accelerate user adoption
- 2/ support communities we like with affordable education
- 3/ learn by doing, get known, expand our network

How & What

Open source, battle tested products

- We curate the best products
- We test them for you
- We provide turn key solution

We introduce you to

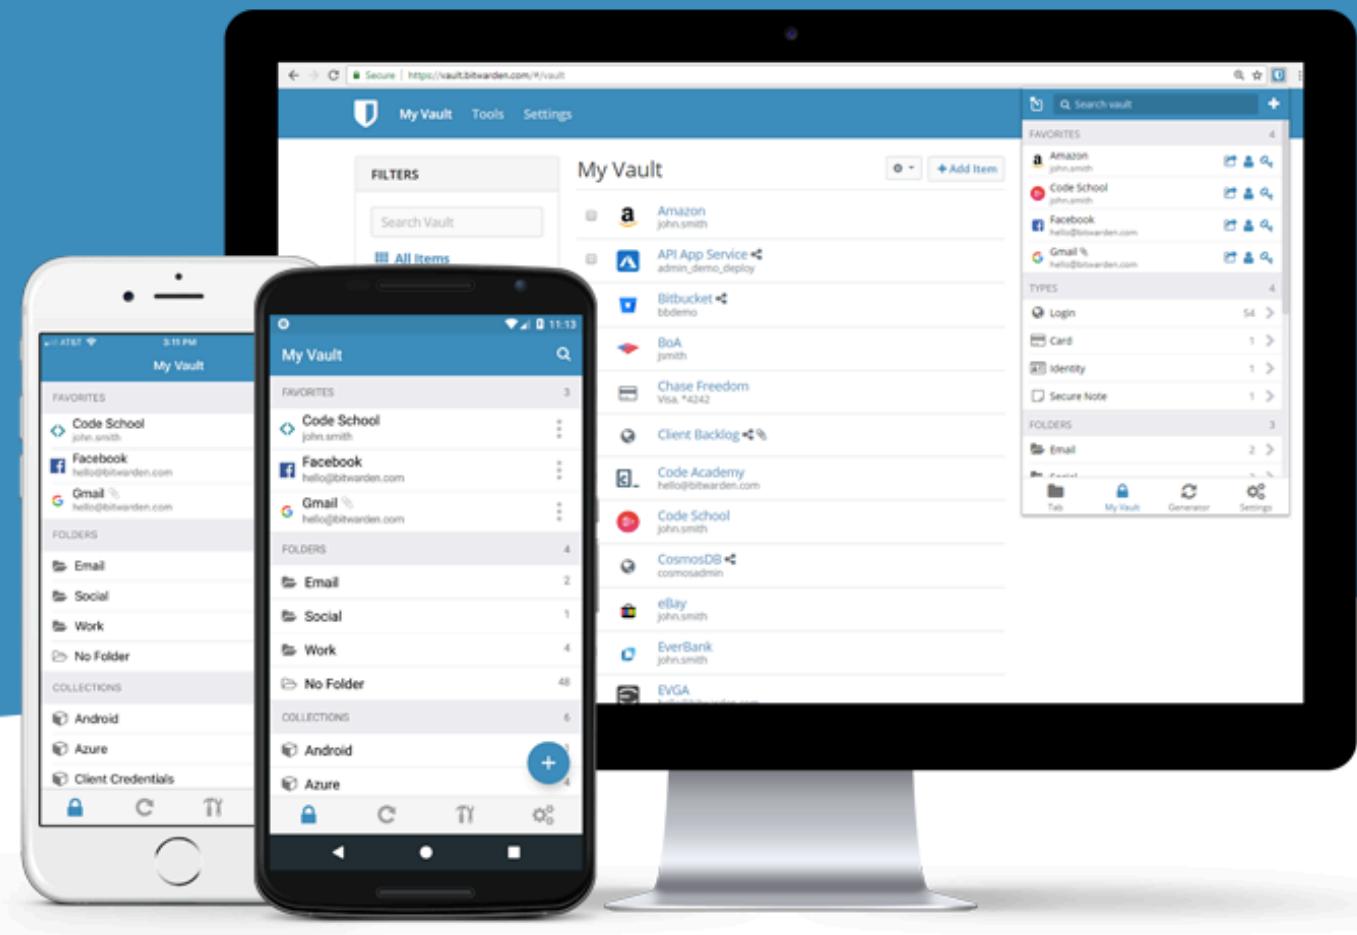

Bitwarden, Metamask, DAI, ETH, TrustWallet
Ledger Nano X, Uniswap.io, Oasis.app

Bitwarden

Solve your password management problems

The easiest and safest way for individuals, teams, and business organizations to store, share, and sync sensitive data.

Install extension on Firefox, Chrome or Brave

Metamask

Install extension on Firefox, Chrome or Brave

METAMASK

Brings Ethereum to your browser

Back Up Phrase

Think of it as: Master Password + Crypto IBAN

Keep it secret: Never give it to anyone

Anyone who finds it has full control over your funds

Metamask & Bitwarden

Metamask Back Up Phrase → Save in Bitwarden

Metamask Password → Save in Bitwarden [optional]

Public address

Think of it as: Crypto IBAN

Share the love: Give it to anyone

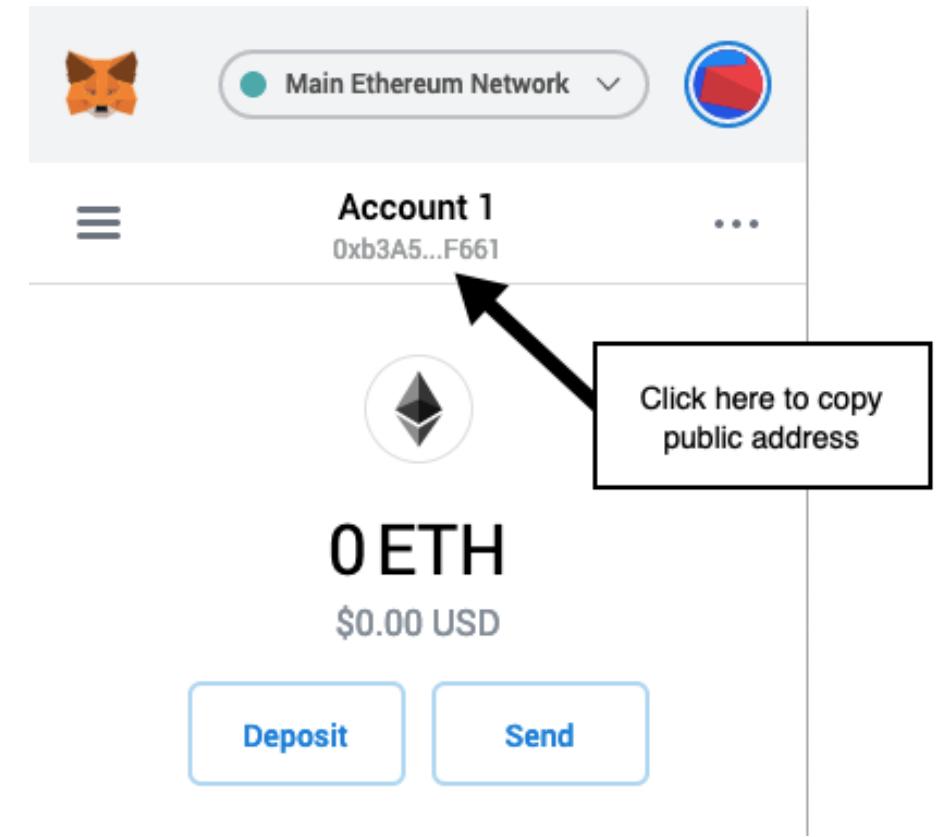

Typically you share it with someone who wants to send you funds

Receive funds

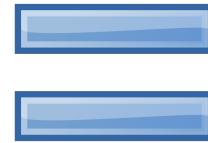

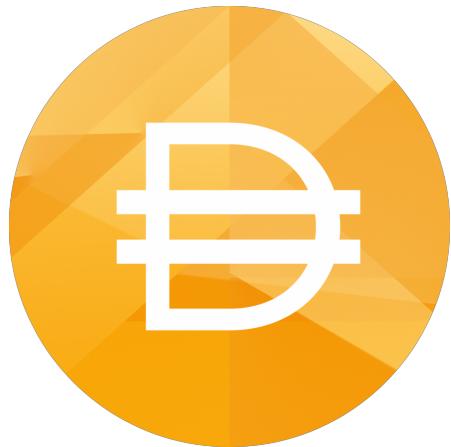

Share your Public Address on the forum

It should look like:

0xb3A566ad3297A46A95C2b65437EF661

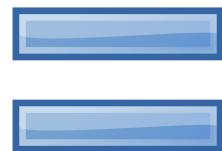

DAI

“Stable Coin”

ETH, Ether, Ethereum

Highly volatile. Extremely high risk.

Required to pay transaction fees

Ethereum: Context

100% Open Source and was funded by a public fundraise in 2014.

The leading crypto project in number of people working on it:
100+ scientists all around the world working on improving it and
1000s of developers building on top of it.

Ethereum is responsible for triggering the last bull market cycle
in 2017 (when the market goes up for months), the one through
which billions of USD were thrown into the crypto market.

Ethereum: What it is

Ethereum is all of this:

A Digital Asset

A Network

A Database

A Protocol

Ethereum does to applications what Bitcoin does to money: it removes the need to have a trusted third party.

Blockchain: The Mind Bender

What we just told you usually takes weeks to digest.

So not to worry if you need find it hard
to wrap your head around these concepts at first.

Storing Crypto Funds

Scale security to the amount of fund you are storing

1/ Central Exchanges: rather unsafe

may get hacked or close down, only keep funds on exchange for short amount of time

2/ Extensions & Software Wallet: safer

hard to hack, but possible since you might use this every day

3/ Hardware Wallet: safest

very hard to hack, that's where you store biggest quantities

Ledger Wallets

Ledger is currently the reference

Only buy it on the official website

www.ledger.com

Crypto Exchanges

aka “*Centralized*” exchanges

Just like a stock exchange, but for crypto

Consider using:

[coinbase.com](https://www.coinbase.com)

[bitstamp.net](https://www.bitstamp.net)

Access Your Funds From a Different Wallet

Go to TrustWallet website

TrustWallet.com

Install the app on your Smartphone

Figure it out :)

Scammers

The crypto space is full of scams: “free give aways”, “free money”, “pyramid schemes”, impersonations, etc

If it looks too good to be true, it's most likely a scam

Lots of scammers on Telegram

Split & Encrypt – step 1

Download this web page locally <https://iancoleman.io/shamir>

Switch off your Wifi

Enter your Back Up Phrase and split it

Test it works fine

Split & Encrypt – step 2

Use **one single channel** per part you share

For instance, share...

Part 1 via gmail with your mum

Part 2 via protonmail with your brother

Part 3 via telegram with your best friend

Part 4 via signal with your geek friend

Never use the same service to share any of the parts

Uniswap.io

Trade ETH for DAI on a decentralized exchange

0x82F3...B640

Swap

Send

Pool

This project is in beta. Use at your own risk.

Input

0.01

Balance: 0.1979

ETH

Output (estimated)

2.279

Balance: 0.012

DAI

Exchange Rate

1 DAI = 0.004387 ETH

Trade, Borrow, and Save using Dai.

Trade

Place orders in the Marketplace, or simply exchange your tokens instantly for what's available.

[Start Trading](#)

Borrow

Lock your tokens as collateral to generate Dai, a decentralized stablecoin soft-pegged to 1 USD.

[Borrow Dai](#)

Save

Earn savings on your Dai by locking it into Oasis Save. Automatic and non-custodial.

[Save Dai](#)

Grow real trees by donating interest

Plant trees for free using interest your DAI generates.

10 trees are planted for every \$1 of interest.

Stop donating at any time.

Learn how it works

Crypto Kitchen Workshop

Congrats!

You just used more blockchain products in 2h
than most people in their first 2 years!

Made with love by...

Barcelona Blockchain Love
